

Indicating Pressure Switch

Description

The Matheson Tri-Gas Indicating Pressure Switch (IPS) contains a pressure scale similar to a gauge for local indication, and a magnetically activated set of contacts for remote indication. The alarm point is user settable from the front of the IPS.

Features

- 2-1/2" Dial for resolution
- Stainless steel or brass
- 1/4" MPT bottom connection
- User settable, front mounted set point indicator, magnetically activated

Specifications:

Power: 10 W maximum
Current: 0.5 A maximum
Contacts: Normally open (no pressure)
