## Single-Stage Corrosion Resistant Nickel-Plated Brass Regulator

### Description

Regulators with design features to resist attack from corrosive gases.

### **Applications**

- Pressure regulation of acid forming halogen gases, such as chlorine, hydrogen fluoride, hydrogen bromide, and silicon tetrafluoride.
- Large Cv provides higher flow with low vapor pressure gases

Shown with optional cross purge.

### **Design Features/Components**

- Nickel plated brass body provides good corrosion resistance in halogen services
- 2" inlet and delivery pressure gauges
- Bonnet ported and threaded to pipe gases away from work area
- Porous metal filter protects seat from contamination
- Supplied with a stainless steel diaphragm valve
- 1/4" compression tube outlet connection
